Annex 3: Employee Hygiene Guidance and Requirements

The purpose of this guidance document is to encourage employee practices and behaviors that can help prevent food handlers from spreading viruses and bacteria to food that cause foodborne illness outbreaks. Below is a list of highly infective pathogens that are transmissible through food and cause severe illness:

1. Norovirus
2. Hepatitis A virus
3. *Salmonella Typhi*
4. *Shigella spp.*
5. *Escherichia coli (E. coli) O157:H7* (or other Enterohemorrhagic or Shiga toxin-producing *E. coli*)
6. Other enteric bacterial pathogen such as *Salmonella* or *Campylobacter*

If an employee has been diagnosed by a health practitioner to have any of these pathogens, prior to returning to work, they must be cleared by their health practitioner and the Health Department. In lieu of a diagnosis of any of these pathogens, employees can return to work if they have been free of the symptoms listed above for 24 hours or more.

Section 2-201 of the *Colorado Retail Food Establishment Rules and Regulations* states that management has the responsibility to inform and monitor conditional employees or food employees to ensure that they have good hygienic practices and know when they should not come to work because of illness.

Should employees exhibit the following symptoms, refer to section 2-202 of the *Colorado Retail Food Establishment Rules and Regulations* to determine when a food handler should be excluded or restricted from food handling duties:

- Vomiting
- Diarrhea
- Jaundice (yellow skin or eyes)
